

# 如何给聚乙烯板材去胶

## How to remove glue from polyethylene sheets

扬州卓泰新材料有限公司在近几年内板材行业不断发展的形式下,对于聚乙烯板材的生产也已经成为各大行业中普遍采用的板材之一,其超高性能得到了广大用户的普遍认可,在应用一段时间后可能会出现脱胶的现象,这时就需要施工人员在施工完毕后把保护层从聚乙烯板材上撕下来的时候,粘胶会有一些被留在了板材产品上,造成美观度下降。如何去除聚乙烯板材上的粘胶一直是人们很头疼的问题,对此为了更好的帮助到大家,专业技术人员对其去除方法介绍如下:

With the continuous development of the panel industry in recent years, Yangzhou Zhuotai New Materials Co., Ltd. has become one of the panels commonly used in various major industries for the production of polyethylene panels. Its ultra-high performance has been generally recognized by the majority of users. , the phenomenon of degumming may occur after a period of application. In this case, when the construction workers tear off the protective layer from the polyethylene sheet after construction, some of the adhesive will be left on the sheet product, causing Decreased aesthetics. How to remove the adhesive on polyethylene sheets has always been a headache for people. In order to better help everyone, professional technicians introduce the removal methods as follows:

若想要去除超高分子量聚乙烯板材上的粘胶,可以使用脱胶清洗剂清洗,清洗后的板材光滑无胶痕、无煤油味,并且该工艺过程简单,成本低,能全面提高劳动生产率,降低费用,无环境污染。

If you want to remove the adhesive on ultra-high molecular weight polyethylene

sheets, you can use a degumming cleaning agent to clean them. The cleaned sheets will be smooth and have no glue marks or kerosene smell. Moreover, this process is simple and low-cost, and can comprehensively improve labor productivity. Reduce costs and no environmental pollution.

有关对于聚乙烯板材上粘胶的去除方法，暂时为大家介绍到这里，只有我们对其做好日常维护及清洁工作，才能够确保对其应用更加长久。

Regarding the removal method of adhesive on polyethylene sheets, we will temporarily introduce it to you here. Only if we do daily maintenance and cleaning work can we ensure that it can be used for a longer period of time.
