

Usage and maintenance methods for PVC table mats:

In terms of use:

1. When laying, ensure that the tabletop is flat and clean to avoid particles that may cause unevenness or damage to the table mat.
2. Avoid placing items with high temperatures on the table mat to prevent damage from scalding.
3. Try to avoid using sharp objects to scratch the table mat.

In terms of maintenance:

1. If there are stains, they should be wiped with a clean and damp cloth in a timely manner to prevent the stains from staying and penetrating for a long time.
2. Regularly clean the table mat with mild detergent and water, then rinse it with clean water and let it dry.
3. Do not use corrosive cleaning agents such as strong acids and alkalis to clean the table mat.
4. When not in use, the table mat can be rolled up for storage, but excessive folding should be avoided to prevent creases from being difficult to recover.
5. Avoid prolonged direct sunlight to prevent aging and discoloration of the table mat.
